## Product Change Notification

Dear Customer,

As part of our continual commitment to deliver outstanding service to our customers and accelerate Eaton's competitiveness in the marketplace, Eaton is currently working to streamline its manufacturing operations in Europe. Following on from our previous communication, all manufacturing of Low Voltage, Medium Voltage and High Speed fuses will transfer from our Burton-on-the-Wolds, United Kingdom facility to our well-established Gyor facility in Hungary.

As part of this ongoing restructuring process, the Country of Origin for each part number manufactured in Burton will be changed from the United Kingdom to Hungary.

Please find attached to this document a list of the affected part numbers. Please note that this change will not have an impact on the order capture process or the quality and performance of our products.

Further correspondence will follow as more products are passed over to the Gyor manufacturing site.

If you would like further information on this change, please contact the undersigned or your local sales representative.

Yours faithfully,

Simon Pinkney  
**Director of Product Marketing**  
**Bussmann series products- Industrial Control & Protection Division**

**E-Mail:** [SimonPinkney@eaton.com](mailto:SimonPinkney@eaton.com)

**List of affect parts:**
