

# Circuit Protection For Construction And Maintenance

## EDISON FUSE

[www.edisonfuse.com](http://www.edisonfuse.com)

**With roots reaching back 100 years, Edison Fuse is a leading provider of high-quality overcurrent protection products for North America. We have the resources and technology to develop circuit protection solutions to safeguard your electrical systems. Our proven products are found in a broad range of applications throughout commercial and industrial power distribution systems.**

**Edison ... a name you can trust and the capabilities you can depend on.**

### **MEETING SPECIFIC MARKET NEEDS**

Edison has gained significant, proven experience serving the needs of the contractor, and the new commercial and industrial construction markets. We understand and address the demanding requirements specific to these markets with exceptional level of support and service to meet tight construction timetables. This "customer first" attitude has earned the confidence of electrical contractors, consulting engineers, design/build contractors, maintenance engineers, key inspectors and other professionals in the construction market.

### OFFERING A COMPREHENSIVE PRODUCT LINE

Edison offers customers a comprehensive line of overcurrent protection products that meet and exceed all industry and government standards. Our high-quality, competitively priced Edison and Bullet branded products are UL-listed, have earned necessary agency approvals and are particularly suited to the requirements of the construction market. Manufactured in ISO9001 certified facilities for consistent quality, our fuses and related products are distributed throughout the United States and Canada.

In addressing the needs of the construction market, Edison fuses provide reliable and cost effective overcurrent protection. Our complete line of fuses and accessories includes:

- **Current limiting fuses** Class RK5, RK1, CC, G, J, L and T
- **General purpose fuses** Automotive, midget, glass and ceramic, one-time and plug
- **Special purpose fuses** Semiconductor (U.S. and British-style), lift truck and European standard (bottle fuses)
- **Medium E-rated and R-rated, and high voltage fuses**
- **Canadian fuses**
- **Fuseblocks and fuse holders**
- **Fuse reducers**
- **Power distribution blocks**
- **A/C disconnects and box cover units**

## RECENT ADDITIONS TO OUR PRODUCT LINE: Building on a Strong Tradition

Throughout our century of operation, Edison has brought to market an extensive range of new circuit protection products and product enhancements. Today, this tradition lives on as we continue to offer new products to meet the needs of customers and to increase the safety of people and property.

**Edison Indicating Fuses** New, easy-to-read indicating fuses offer clear black-and-white indication of a blown fuse. Indicating fuses help reduce downtime by enabling the electrical troubleshooter to quickly identify a possible opened fuse and get the system back up and running in the least amount of time. We currently offer Class RK1 and Class J indicating fuses.

**A/C Disconnects** Our new pre-assembled disconnect with cable whip comes pre-wired from the factory and can reduce installation time by as much as 50 percent. Available in fusible and non-fusible versions, our new disconnect with integrated GFCI combines two separate installations into one to comply with NEC® code requirements.

**Service Kits** New fuse service kits are filled with the most popular fuse types and sizes for the most common applications – providing quick access to the right replacement fuse to reduce downtime. Organized in a compact, sturdy carrying case, these handy kits are available in three popular versions: Midget, Class CC or Class RK5. Each kit includes two free tools – a fuse tester/puller sized to the particular fuse assortment and a useful Crescent® wire stripper for use in performing wiring tasks.

### PROVIDING LOCALIZED SUPPORT AND RESPONSE

Over the years, Edison has earned a well-deserved reputation for service excellence, and we continue to build on this tradition with every customer contact. We understand the needs of the markets we serve and have the ability to respond quickly and effectively in meeting those customer needs.

Relying on a network of strategically located independent manufacturer's rep organizations, we can provide highly localized service. Our reps have extensive knowledge of the local construction market, and many carry needed inventories for immediate product availability – usually next-day delivery or same-day pickup.

Our knowledgeable customer satisfaction team provides incredibly fast turnaround on job quotes – typically within just hours.
