## Product Change Notification

Dear Customer,

As part of our continual commitment to deliver outstanding service to our customers and accelerate Eaton's competitiveness in the marketplace, Eaton is currently working to streamline its manufacturing operations in Europe.

Following on from our previous communication, all manufacturing of Low Voltage, Medium Voltage and High Speed fuses will transfer from our Burton-on-the-Wolds, United Kingdom facility to our Gyor facility in Hungary.

As part of this, the labelling of parts will be changed to not only reflect a changed Country of Origin but also the Eaton brand. Changes to the product markings will include: Country of origin, removal of the B-logo and use of Eaton logo instead, addition of semi-conductor type, text colour change from red to black, as well as multiple layout changes. The below drawing demonstrates how the product markings will change:

Please find attached to this document a list of the part numbers which are being moved. Further correspondence will follow as more products are transferred to the Gyor manufacturing site.

Please note that this change will not impact the order capture process or the quality and performance of our products.

If you would like further information on this change, please contact the undersigned or your local sales representative.

Yours faithfully,

Simon Pinkney  
Director of Product Marketing  
Bussmann series products- Industrial Control & Protection Division
