New Brochure from Edison® Fuses Highlights Products/Services for Contractor, New Commercial and Industrial Applications

ST. LOUIS – This brochure contains useful information for electrical and design/build contractors, consulting and maintenance engineers, inspectors and other professionals in the commercial/industrial new construction market. A complete listing of fuse categories for both Edison® and Bullet branded overcurrent protection products is given. Also included is more detailed information about the new Edison indicating fuses, A/C disconnects and fuse service kits.

Rapid response capabilities such as fast turnaround on job quotes (typically within hours), same-day pickup or next day delivery is also described.

To receive a copy of this brochure, contact your local Edison sales representative or visit www.edisonfuse.com.

Edison products are manufactured by Cooper Bussmann, a division of Cooper Industries. Cooper Bussmann is headquartered in St. Louis, Missouri, and manufactures and markets circuit protection products globally for the electrical, electronic and automotive industries. Additional information about Edison Fuse Company is available online at: www.edisonfuse.com.

Editor's Note: Please direct Reader Inquiries to Marsha Wolke, IQ Systems, 18 N. Central Drive, O'Fallon, MO 63366.
